Consulting and Engineering

OpenNebula offers a level of **simplicity and flexibility for building enterprise private clouds** that is hard to match. Whether you run on-premises KVM or LXC infrastructure, or prefer an elastic private cloud that extends into public bare-metal providers, OpenNebula adapts to your model. The same foundation is also used to build **AI Factories**, enabling secure, multi-tenant GPU infrastructure for training and inference workloads. OpenNebula allows you to combine on-premises and external resources into a single, coherent cloud while retaining full control over images, operations, and long-term strategy—all without vendor lock-in.

However, if getting your solution off the ground and running smoothly right from the start is critical to you, **we can help you out**. **Our team of professionals** is equipped with the know-how and expertise to address your needs from **design, deployment, performance optimization**, and overall operation. Work with our team and save on your time and resources spend.

OpenNebula offers the following value-added services:

- ✓ Our **Consulting Services** team takes on a consultative role and focuses on best practices in the successful evaluation, design, and operation of OpenNebula-based cloud architectures, and in the optimal configuration and customization of OpenNebula to fit into your data center.
- ✓ Our **Engineering Services** team works closely with your IT staff on the initial installation, integration, configuration, tuning, and operation of OpenNebula within your environment.

Pricing:

Professional Services engagements are billed on an hourly basis in **packages of 50 and 100 hours**.

Professional Services	Pack of 50 hours (expires in 3 months)	€11.000 (\$13,750)
	Pack of 100 hours (expires in 6 months)	€20.000 (\$25,000)

Consulting and Engineering Services are Remote

OpenNebula Services are remote services delivered by OpenNebula Systems Engineers and Consultants with years of experience designing and building cloud solutions based on OpenNebula. Our remote services provide:

- More affordability - eliminating travel expenses
- Improved flexibility - allowing partial work days, when necessary
- Enhanced agility - accommodating most scheduling requirements
